1. First Movers in Phone Number App Space

Phoner is one of the first players in the space of phone number apps.

First launched in 2016, it created a way for users to buy multiple numbers on their phones, and paved the way for an entire market of phone number apps today.

To date, Phoner remains one of the top rated phone number apps, with over 4 million of downloads to date.

Phoner is available for both iOS and Android.

2. Top Rated

Phoner is currently rated 4.6 Stars on Apple App Store based on 9,000 reviews.

3. Get multiple phone numbers for different uses

Phoner gives you multiple phone numbers within a single device. Use Phoner for everything from one-time Craigslist transactions, to talking to customers, or texting that stranger you just met on a dating app.

4. Free to get started

The best part about Phoner? Immediately after signing up, you get a free randomized phone number, plus some trial credits on sign up to let you try out the service for free.

With Phoner, you can start sending anonymous texts or make private calls without the need to pay and purchase numbers.

5. Countries from all over the world

If you prefer to have a permanent number to keep as your own for work or person use, you can also select a local number from over 30 countries.

6. Unbeatable Low Price for Phone Numbers

Phoner offers one of the most affordable rates for phone numbers for as low as USD1.99/ month for US phone numbers.

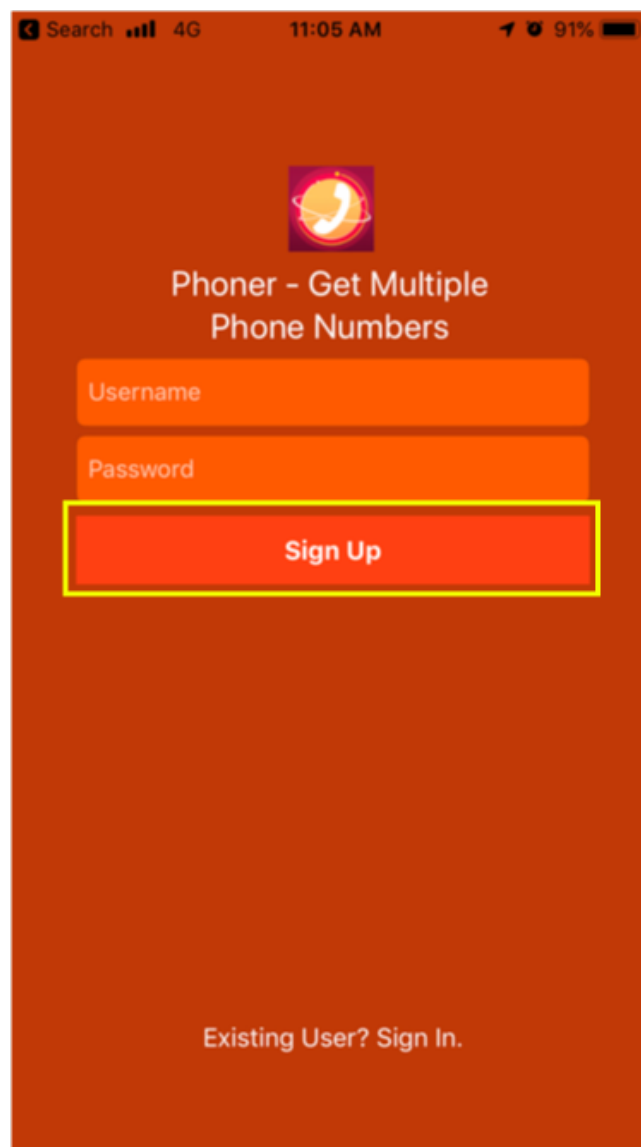

If you are not ready to purchase, you can even get started with texting or calling for free with the free anonymous phone number.

7. Phoner - How to Use

Step 1: Signing up for an account on Phoner

You can start to use Phoner right away, but we highly recommend starting up an account to to use your same account across multiple devices.

Signing up a new account is easy. Make sure that you have 'Sign Up' selected on the main page. Next, all they need to input is a username and password. Phoner does not require any personal information. protecting our users' identity.
